

Subscribing and Configuring Initial Access to SAP Integration Suite

On this page

- [Prerequisites](#)
- [Procedure](#)

Subscribe to the SAP Integration Suite in SAP BTP cockpit and assign the Integration_Provisioner role to gain access.

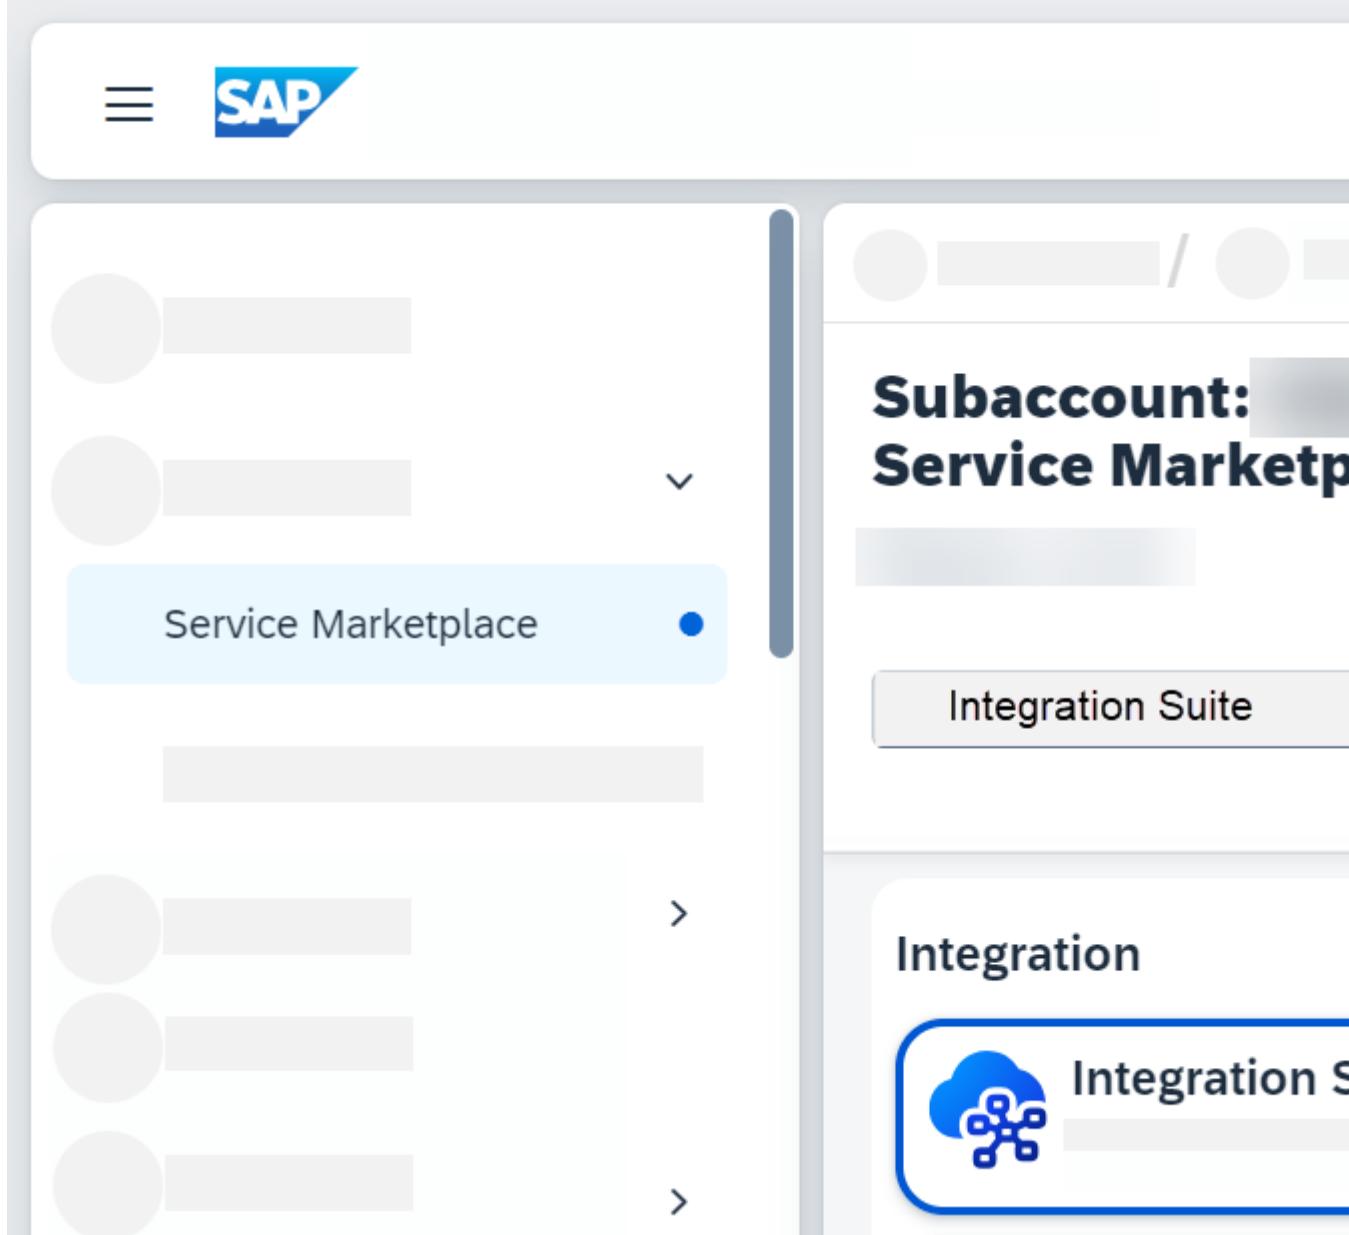

Prerequisites

You've created a subaccount in your assigned global account using the SAP BTP cockpit and added the desired service plans for Integration Suite to the subaccount. For more information on service plans, see [SAP Discovery Center - Integration Suite](#).

Procedure

1. In the navigation area of the subaccount, choose Services → Service Marketplace.

2. Search for Integration Suite and choose Create on the overview page.

3. In the New Instance or Subscription dialog box, select the Plan and choose Create. Wait for the subscription to complete successfully.

Note

For different plans see the SAP Note [2903776](#).

Check the status of the submission in the subscriptions section on the Instances and Subscriptions page. If the subscription is successful, you notice the status of the Integration Suite shown as Subscribed.

4. You must have specific roles to access the Integration Suite. To assign these roles navigate to Security -> Users.
5. Choose Create to add a new user.

Tip

If the user details exist already in the subaccount, you can skip this step and continue from [here](#).

6. Enter the User Name and E-Mail, and choose Create.

7. Choose the user

The screenshot shows a SAP Fiori application interface. On the left, a sidebar titled "Users" displays a list of users represented by icons and blurred names. A blue dot is positioned next to the first user in the list. On the right, a main panel is titled "Subaccount:" and contains fields for "User Name" and "Idea Pro". The "User Name" field is filled with a blurred value, and the "Idea Pro" field has a blue border, indicating it is currently selected or active.

8. On the right-hand panel, scroll to the Role Collections section

The screenshot shows a SAP Fiori application interface. On the left, there is a vertical list of users, each represented by a small profile picture, a blurred name, and a blue circular icon. The list includes entries for 'Users' and several other users whose names are redacted. On the right, there is a large panel titled 'Subaccount:' which contains a form with fields for 'User Name' and 'Ident Pro'. The 'User Name' field has a blue underline, indicating it is the active or selected field.

9. Choose 檢 Additional Options and choose Assign Role Collection.

The screenshot shows a SAP Fiori application interface. On the left, there is a list of users under the heading "Users". On the right, there is a section titled "Subaccount:" with fields for "User Name" and "Integration_Provisioner". A note at the bottom states that the Integration_Provisioner role is assigned automatically in some cases.

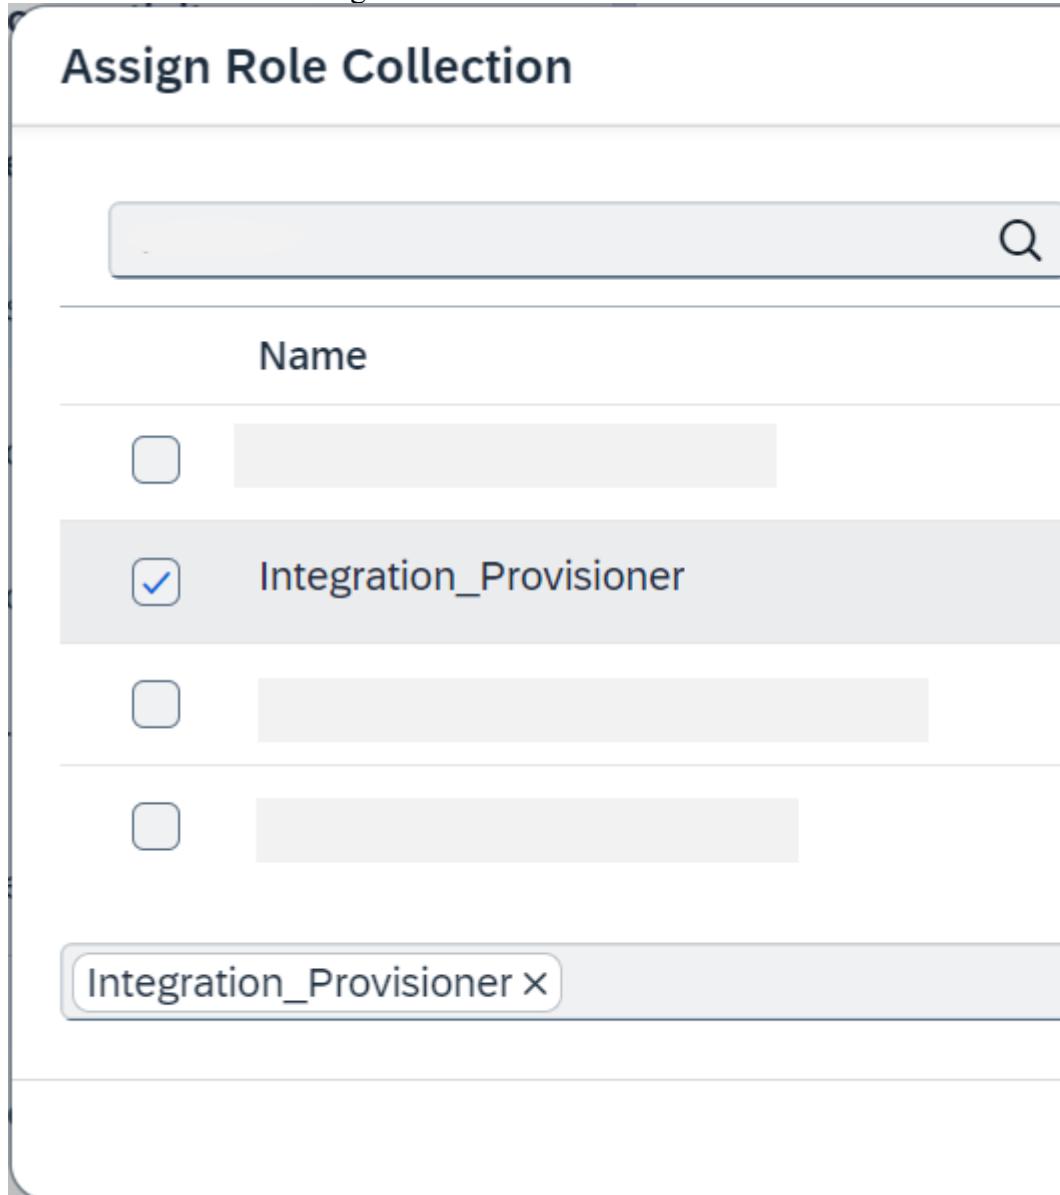

Subaccount:

User Name	Integration_Provisioner
[REDACTED]	[REDACTED]

Note

In some cases, the Integration_Provisioner role is assigned automatically.

10. In the resulting dialog box, choose the checkbox for the Integration_Provisioner role collection and choose Assign Role Collection.

11. Navigate to Services Instances and Subscription and then select the instance of the application.

12. Choose Go to Application to launch the Integration Suite home page. For more information, see [Working with Integration Suite Home](#).

Tip

Clear your web browser cache and cookies before navigating to Go to Application. To access the application, you'll need the correct authorization. If you try to enter without it, you'll be asked to assign the necessary role. If you're still unable to access the application after role assignment, simply log out and then log back into the SAP BTP cockpit. This should grant you access to the application.

Tip

To remain informed and receive timely notifications about planned and unplanned downtime, customer communications, and maintenance announcements, we recommend you maintain your contact information via Cloud System Notification Subscriptions (CSNS). For more information, see [Cloud Availability Center & Cloud System Notification Subscriptions](#).
